

MTI NEWS

Yes, we can!

Computerisation

This month sees the first preparations in the replacement of our TMS System. Along with Transics, we are taking a step forward into full computerisation. This applies right across the board from chauffeuring, to processing and invoicing. This computerisation does not only benefit us, but also you as a client! Guaranteed cost savings are already evident, meaning that we can keep our prices competitive in the future. Our productivity has also increased, and that is the greatest advantage for you! The quality and service that you have come to expect from us will continue to be upheld. We want to raise our game in order to offer you more focused service and customisation.

Using an Online Web Application, you can directly consult all information relating to your orders. In brief, a plus for us is always a huge plus for you!

Fleet

Also this month, one of our newest acquisitions has arrived: Our, brand-new Mercedes Altego 1224. Its loading capacity of 5 tonnes means that we can offer you continuity and custom service. If you would like more information about this vehicle, please do not hesitate to contact us directly. We will be happy to provide you with no-obligation information about what we can do for you.

We also expect our second vehicle at the end of this month: the Volkswagen Caddy Maxi. The implementation of this vehicle will keep our prices competitive and will mean that small freight will not require a vehicle with excess-capacity. A cost saving for us and therefore for you! We can also provide you with all information about this vehicle. If you are interested in knowing more, then please contact us to discuss the options.

Availability

As you will have come to expect from us, we are open to you 24/7, every day of the year. Unfortunately, there will be one day this year that we will not be able to be of service to you. On 26th May our fleet will be unavailable for the day, due to the implementation of our TMS System, providing our vehicles will onboard computers, and this will take a day.

Naturally, we will be fully available to you again from 27th May when you will be able to use our services as usual.
